

“ YOU MIGHT AS WELL RENT THE BEST ”

KingVac

The world's most powerful wet or dry vacuum loader.

**VACUUM

LLC

Vacuum Truck Rentals chose The King Vac to answer a critical need for a vacuum loader that combined high CFM and deep vacuum. The KingVac combines different loading principles in one powerful machine: vacuum loading as a wet vac machine and air conveying for dry vac use. No longer is a separate machine required for each type of loading.

Vacuum loading allows the hose to be submerged for heavy liquids and semi-solids. Air conveying is used to load powders and dusts when the hose is not fully submerged. No single machine accomplishes this better than the King Vac.

The King Vac has earned its reputation as the world's most powerful vacuum loader because it combines so many essential features in one machine.

ALL VTR KINGVACS HAVE:

- High CFM, up to 3,700 CFM (more than 200 MPH)
- Deep vacuum – a full 27 inches of vacuum
- X-D (Xtreme-Duty) option for loading extremely fine dusts and powders
- No manual changeover from wet to dry loading
- Extremely low noise level at rear of truck - less than 85db
- Operator friendly with easy dust control - no bag house
- Cyclone separators self-clean individually while vacuum loading continues
- High CFM and deep vacuum allow operators to completely submerge the loading hose
- Pressurized liquid discharge directly from the tank

VTR OFFERS A FULL LINE OF KINGVACS WITH THESE FEATURES:

- 3,000 gallon tank (2700/300)
- Full opening hydraulic rear door
- Hydraulic tank lift
- X-D (Xtreme Duty) Filter Package
- LR4K liquid-ring vacuum pump
- ASME certification
- DOT 412
- 20" Manway with ladder and platform
- Rear work lights
- Hydraulic vibrator
- Back-up alarm
- 400 HP Diesel Engine
- High pressure water jetting system, 35GPM @ 2,000PSI
- Cross-over piping system
- Hydraulic hose reel with 500 feet of 3/4" jetting hose
- Auxiliary hydraulic power valve
- Auxiliary transfer pump
